About Me:

I am currently taking a break from work to develop new skills. In 2021 I began learning programming alongside my previous employment, in order to pursue a career as a software developer. I am attending a Creative Computing bootcamp with Bath Spa University until February 2022. I have found programming to be an enjoyable activity as I find logical thinking and problem solving rewarding, and these are the aspects I've enjoyed the most in previous roles. I am learning Agile, the ideation process, html, CSS and Javascript. I have also used Python. Some of my strongest skills are: the ability to collaborate easily with people, problem solving and attention to detail.

One of the things that excites me the most about programming is seeing my ideas come to fruition. I've enjoyed creating my own projects and seeing where I can make improvements to the design.

Employment History:

MD Group (2014-September 2021)
